

The Oxide Electronics Lab is Recruiting Graduate Students

For MSc and PhD degrees in the Dept. of Electrical Engineering
Technion – Israel Institute of Technology

For interdisciplinary research at the interface between electronic devices and
physics of advanced oxide semiconductors

The group's research activities include:

Design and characterization of oxide devices

Development and study of exotic semiconductors

Integration of magnetic oxides with conventional semiconductors

*Candidates with background in Electrical Engineering, Materials Science,
Physics, Chemistry and related fields are welcome to contact Lior Kornblum
LIORK@EE.Technion.ac.il*
